.....Our mission is to provide high quality equipment that can be built from standardized modules to meet customer's specific requirements.....

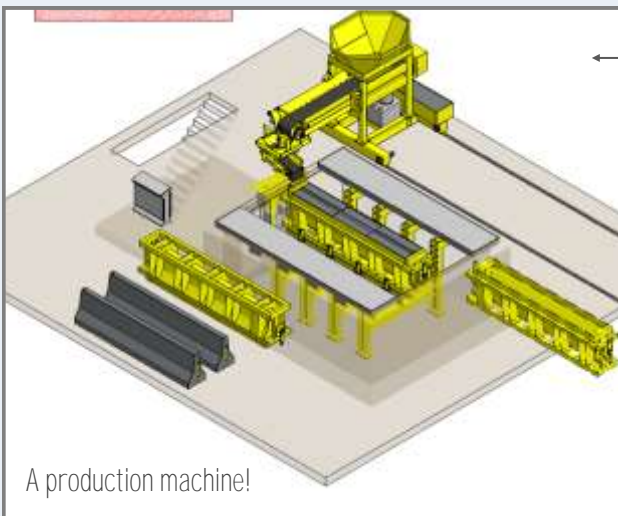

Teksam is known for it's ability to customize any kind of machine producing concrete elements!

Median barrier form.

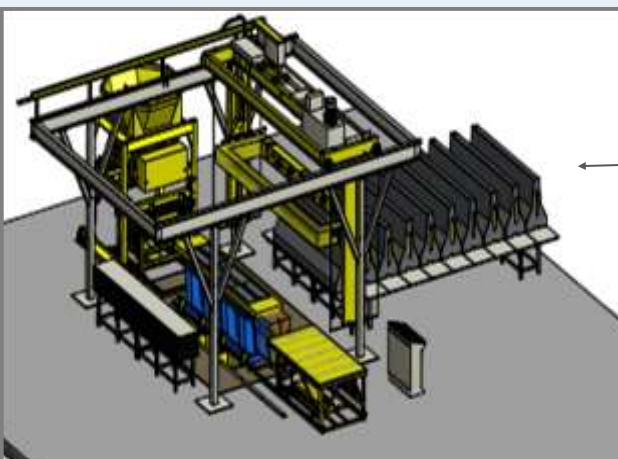

This Production Station is rated for products with a maximum length of 4.000 mm and a maximum height of 1.500 mm. The Vibration Unit will carry a load of 7.000 kg

A production machine!

This Production Machine includes:

- ◆ Control desk
- ◆ Powerpack
- ◆ Rotating distributor
- ◆ Belt feeder
- ◆ Forms
- ◆ Elevator
- ◆ Vibration Unit

A production machine with automatic crane - also avaiable with semi-automated crane.

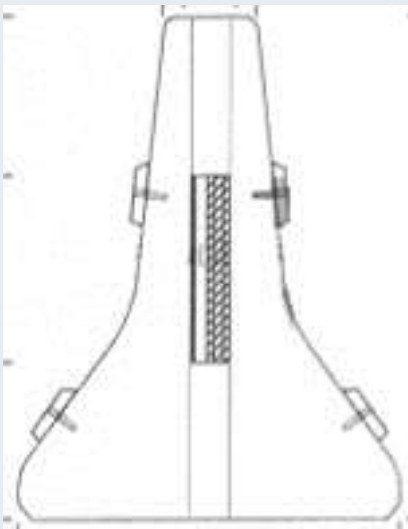

Example of a geometric form which ensures a maximum of security on the road. It's possible to mount warning signals and hide cables etc.

Median barriers can be efficiently and rapidly produced along with other products of the same general size.

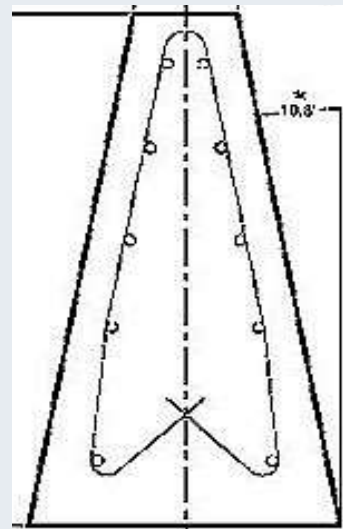

Samples of the most common median barrier types—ask for further details and measures.

New Jersey style

F-shape style

Constant slope (Texas style)

Teksam machines follow all official standards in which country they appear!

More than 30 years of experience

Teksam designs and builds high-performance equipment for the Drycast Concrete Industry. Founded in Denmark 1979 we have supplied equipment for the concrete industry for more than 30 years. Our innovative systems and commitment to customer service have made us the first choice for companies globally.
