In this edition of **INFO** we focus on the "Manipulator" that is one of our latest developments. A number of "Manipulators" have by now been successfully installed in Scandinavia.

Teksam Manipulator "DR 1500 S": In 2012 and 2013 Teksam has developed a "Manipulator". The "Manipulator" automates the mould handling and demoulding and increases output considerably. A Manipulator replaces the over-head crane traditionally used.

Pit mounted Manipulator

Curing area for "Road Sign Posts". Each "Road Sign Post" has 3 treaded inserts casted into its top for fastening of the road signs.

"Road Sign Posts" automatically produced in a quad mould and demoulded by a Manipulator.

Floor mounted Manipulator

Grade ring production

Our mission is to provide high quality equipment that can be built from standardized modules to meet customer's specific requirements.....
