

Coring Machines

More than 35 years of experience!

June - 2016

Welcome to the 5th issue of Teksam INFO!

In this issue, we focus on [Teksam Coring Machines](#) (Core Drilling Machines).

Since 1989 Teksam has been supplying Coring Machines and is currently marketing a broad program for factory drilling of inlets and outlets in concrete products such as Manhole Bases, Tanks, Catch Basins, Pipes and Box Culverts etc.

Teksam Coring Machine Lineup (HC, HCSP, HCSM and HDD)

Our Coring Machine lineup started with the **HC - the original Coring Machine**. Simple, manual, and easy to operate, this is a perfect solution for customers with a limited number of holes to drill. From our desire to meet customer requirements, Teksam engineers are continuously creating innovative product solutions. Our lineup has now expanded to 4 enhanced production configurations including the HCSP, HCSM, and the ultimate HDD; which features a double turntable (dual station) and various automated features to enable near continuous production and maximum output and efficiency.

Key Features

Each of these four stations feature three basic features; hydraulic operation of the drill; adjustable speed and pressure control, and automatic load sensing and adjustment technology. Within our lineup there is a capability of coring products with:

- OD's up to 3700mm(144")
- Drilling heights up to 3500mm(137") off the table
- Hole sizes all the way to 1500m(60")

In addition, all machines can be customized to perfectly fit your specific needs.

Optional Features

- Pneumatic ejector for the cored block in the bit;
- Quick lock for drill bit mounting
- PLC control for full automation
- Wireless remote control and direct data transfer

All this to ensure that no matter your need
- we have the Coring Machine solution for you!
